

NOTICE

Town Water May Be Muddy!

As a requirement of the Town of Alto Corrosion Control Program mandated by the Georgia E.P.D. The Town will be flushing water and fire hydrants on June 27th – June 30th, 2022 throughout the Town water system. Some residents could experience muddy or cloudy water on these days, which is normal when hydrants are flushed. Care should be taken to abstain from washing clothes, using hot water (which will pull sediment into your water heater) or filling pools on these days.

If you have any questions concerning hydrant flushing, please contact:

GARY KIMBRAL
WATER DEPARTMENT DIRECTOR
TOWN OF ALTO
